Audit and Risk Committee Report for the year under review

1. Introduction

The Audit and Risk Committee (“the Committee”) is pleased to present its report for the financial year ended 31 July 2022 (FY22). The Committee is an independent statutory committee appointed by shareholders. This report considers the statutory and delegated duties in terms of the Companies Act as well as the Committee’s responsibilities in terms of the Cape Town Stock Exchange Requirements. It also addresses some of the matters that the King IV Code on Corporate Governance (“King IV”) advises should be considered by the Committee. In addition to its statutory responsibilities this Committee also assists the Board through advising and making submissions on financial reporting, oversight of the risk management process and internal financial controls, external audit functions and statutory and regulatory compliance of the company. This Committee also dealt with duties delegated in terms of risk management.

2. Membership of the Committee and attendance at Committee meetings

The Committee comprised the following members for the period under review:

Committee members

Riaan van Heerden (Chairperson)

Thabiso Masiela

Yvette Labuschagne

The board of the Company are standing invitees. The Committee comprises only Independent Non-Executive Directors. Shareholders will be requested to approve the appointment of the members of the Committee for the 2023 financial year at the Annual General Meeting scheduled for 15 December 2022. The committee met twice during the period starting from the company’s inception until the date of this report.

3. Roles and responsibilities of the committee

The Committee is governed by formal terms of reference that are reviewed and updated annually, as necessary. These terms of reference guide the Committee in terms of its objectives, authority and responsibilities, both statutory and those assigned by the Board. The Committee has an independent role with accountability to both the Board and to shareholders. The Committee’s roles and responsibilities include statutory and regulatory duties as per the Companies Act, the Cape Town Stock Exchange Requirements, those items recommended in the interest of good governance according to King IV as well as additional responsibilities assigned by the Board. The effectiveness of the Committee is assessed as part of the annual Board and Committee self-evaluation process.

The responsibilities of the Committee include, but are not limited to:

- review and approve for recommendation to and approval by the Board, interim reports, the annual report, the annual financial statements, accounting policies for the Company, and any other announcement regarding the results or other financial information to be made public;
- ensure that the annual financial statements and the annual integrated report comply with all statutory and regulatory requirements;
- ensure that all financial information contained in any submissions to the Board is suitable for inclusion in the financial statements in respect of any reporting period;
- assess annually the appointment of the external auditor and confirm its independence, recommend its appointment to the AGM and approve its fees;
- address the external auditor’s findings and recommendations;

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Annual Separate Financial Statements for the year ended 31 July 2022

Audit and Risk Committee Report for the year under review

- review the work of the group's external auditor and to ensure the adequacy and effectiveness of the group's financial, operating compliance and risk management controls;
- report on the risk management process and assesses the Company's exposure to the top strategic risks;
- monitoring of compliance effectiveness within the Company;
- perform duties that are attributed to it by its mandate from the Board, the Companies Act, the Cape Town Stock Exchange Requirements, King IV and other regulatory requirements;
- review processes and procedures to ensure the effectiveness of internal systems of control including information and technology.

4. Activities of the committee

The Committee fulfilled its responsibilities during the 2022 financial year. The Committee is satisfied that it has conducted its affairs in accordance with its terms of reference and has discharged its responsibilities. During the financial year under review, the Committee executed the following matters:

Reporting

- considered and agreed with the adoption of the going-concern premise in the preparation of the annual financial statements;
- reviewed the appropriateness of the financial statements, other reports to shareholders and other financial announcements made public;
- considered whether the annual financial statements fairly present the financial position of the Company as at 31 July 2022 and the results of operations and cash flows for the financial year then ended;
- considered the solvency and liquidity of the Company;
- considered accounting treatments, the appropriateness of accounting policies adopted and the effectiveness of the Group's disclosure controls and procedures;
- considered whether any concerns were identified regarding significant legal, tax and other matters that could have a material impact on the financial statements;
- reviewed the external auditor's audit report;
- considered and noted the key audit matters as determined by the external auditor;
- reviewed the representation letter, signed by management;
- reviewed the quality and integrity of the annual report and the sustainability information before publication;
- The Committee spent time understanding the valuation methodology and various input factors and judgements applied by GAIA Fund Managers (Pty) Ltd, and challenged these where necessary. The committee is satisfied that the valuation of investments performed fairly reflect the fair value of the investments of the Company.

External audit

The Audit and Risk Committee nominated Moore Stellenbosch Incorporated as the external auditor for the Company for the financial year ended 31 July 2022 and their appointment complies with the Companies Act of South Africa and all other applicable legal and regulatory requirements.

Taking into consideration the criteria specified for independence by the Independent Regulatory Board for Auditors and international regulatory bodies, Moore Stellenbosch Incorporated confirmed in an annual written statement that their independence has not been impaired.

The Audit and Risk Committee was assured that no member of the external audit team was hired by the Company or any other company within the Gaia Group in a financial reporting oversight role during the year under review.

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Annual Separate Financial Statements for the year ended 31 July 2022

Audit and Risk Committee Report for the year under review

The auditor's independence was not impaired by any consultancy, advisory or other work undertaken by them for the Company or any previous appointment as auditor of the Company or any other company within the Group.

The auditor does not, except as external auditor, or in rendering of permitted non-audit services, receive any direct or indirect remuneration or other benefit from the Company or any other company within the Group.

The Audit and Risk Committee reviewed and approved the external audit plan, the budgeted and final fee for the reporting period and the terms of engagement of the external auditors; and pre-approved all audit and permissible non-audit services that Moore Stellenbosch Incorporated provides.

Following the 2022 audit, Moore Stellenbosch Incorporated have been the external auditors of the Company for the year and Pieter-Louw van Der Ahee has been the designated auditor for this year.

It was confirmed that no unresolved issues of concern exist between the Company and the external auditors.

Internal financial and accounting controls

The Audit and Risk Committee is responsible for reporting on the Company's systems of internal, financial, and accounting controls. The Office Review Services Proprietary Limited ("ORS") provided accounting services to the Company for the period under review. The committee is satisfied with the independence of ORS and the quality of the accounting work provided by them during the period under review. The Committee has accordingly considered the reports from external audit on such matters and is satisfied that both reports confirm the adequacy and effectiveness of the Group's systems of internal control and that there were no material breakdowns in the internal control during the financial year.

Risk management and compliance

The Board has responsibility for the oversight of risk management, part of which it may delegate to the Audit and Risk Committee. The Board sets the tone and influences the culture of risk management within the organisation, including ensuring that integrated risk management and internal control systems are implemented.

The Audit and Risk Committee is appointed by the Board to assist in carrying out its responsibilities in relation to risk management and is responsible for overseeing the development, implementation and annual review of a Risk Policy and the process of risk management and ensuring that compliance forms an integral part of GAIA's risk management process.

GAIA Fund Managers (Pty) Ltd is responsible for day-to-day risk management including identifying and evaluating the significant risks faced by the Company; implementing an effective risk management process, including the identification, analysis, and evaluation of risks specific to their area of responsibility; and setting the tone and influence of the culture of risk management.

The Committee is obliged to report any material breach of a relevant legal and/or regulatory requirement in the conduct of the Company. No evidence or indication of any such breach or material non-compliance has been brought to the attention of the Committee by the external auditors or any other party.

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Annual Separate Financial Statements for the year ended 31 July 2022

Audit and Risk Committee Report for the year under review

Comments on key audit matters, addressed by Moore Stellenbosch Incorporated in its external auditor's report

The external auditors have reported on two key audit matters in respect of their 2022 audit, being:

- valuation of investments in subsidiaries – GF Property SPV 1 (Proprietary) Limited and GF Property SPV 2 (Proprietary) Limited; and
- valuation of other financial liabilities - Class A and Class B Preference shares.

Both of these key audit matters related to material financial statement line items and require judgement and estimates to be applied by management. The committee assessed the methodology, assumptions and judgements applied by management in dealing with each of the key audit matters. Furthermore, the committee discussed the key audit matters with the external auditors to understand their related audit processes and views. Following our assessment, we were comfortable with the conclusions reached by management and the external auditors.

5. Conclusion

The Audit and Risk Committee is satisfied that it has complied with all its legal, regulatory and other responsibilities for the year under review. Following the audit of the annual financial statements, the Audit and Risk Committee recommended Board approval thereof.

On behalf of the Audit and Risk Committee

Riaan van Heerden

Audit and Risk Committee Chairperson

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Annual Separate Financial Statements for the 10 month period ended 31 July 2022

Directors' Responsibilities and Approval

The directors are required by the Companies Act of South Africa to maintain adequate accounting records and are responsible for the content and integrity of the financial statements and related financial information included in this report. It is their responsibility to ensure that the financial statements satisfy the financial reporting standards with regards to form and content and present fairly the statement of financial position, results of operations and business of the company, and explain the transactions and financial position of the business of the company at the end of the 10 month period. The financial statements are presented in terms of the International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied throughout the company and supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the directors set standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the business is conducted in a manner that in all reasonable circumstances is above reproach.

The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss. The going-concern basis has been adopted in preparing the financial statements. Based on forecasts and available cash resources the directors have no reason to believe that the company will not be a going concern in the foreseeable future. The financial statements support the viability of the company.

The external auditors are responsible for independently auditing and reporting on the financial statements. The financial statements have been examined by the external auditors and their unmodified audit report is presented on pages 13 to 16.

The financial statements set out on pages 18 to 46 which have been prepared on the going concern basis, were approved by the directors and were signed on 31 October 2022 on their behalf by:

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Annual Separate Financial Statements for the 10 month period ended 31 July 2022

Directors' Report

6. Events after reporting date

On 19 August 2022 the company concluded a specific issuance of B Preference shares for an aggregate subscription of R111 243 027 which was immediately used to purchase additional shares in the subsidiary GF Property SPV 2. The additional funding was reserved for further investments into fibre networks to be completed in the 2022 calendar year.

The company declared a dividend of R 3 172 491 on 31 October 2022 which was determined with reference to its financial results as reflected in its financial statements prepared for the 2022 year of assessment (ended 31 July 2022).

The aforementioned event is considered a non-adjusting event after the reporting period.

The directors are not aware of any matter or circumstance arising since the end of the 10 month financial period to the date of this report that could have a material effect on the financial position of the company.

7. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

8. Secretary

The company designated secretary is Ilzemarie Knoetze (The Office in Stellenbosch (Pty) Ltd).

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF GAIA FIBONACCI FIBRE REIT 1 LIMITED

REPORT ON THE AUDIT OF THE SEPARATE FINANCIAL STATEMENTS

OPINION

We have audited the separate financial statements of GAIA Fibonacci Fibre REIT 1 Limited set out on pages 18 to 46, which comprise the statement of financial position as at 31 July 2022 and the separate statement of profit or loss and other comprehensive income, the separate statement of changes in equity and the separate statement of cash flows for the 10 months then ended, and the notes to the separate financial statements, including a summary of significant accounting policies.

In our opinion, the separate financial statements present fairly, in all material respects, the separate financial position of GAIA Fibonacci Fibre REIT 1 Limited as at 31 July 2022, and its separate financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the separate Financial Statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the separate financial statements of the current period. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<p>As the financial assets and financial liabilities are measured at fair value through profit and loss and the balance is material, significant judgement and assumptions are exercised by management in determining the fair value. We consider these judgements and assumptions to be a key audit matter due to high estimation uncertainty.</p> <p>The valuation of the asset and liability is based on the discounted future cash flows from the underlying investment and cash available to settle the liability. There are estimations involved in the forecasting of the future cash flows, the discount rate used and the annual inflation rate.</p> <p>The future cash flows are highly dependent on the revenue of the underlying investment which is based on the uptake rate of the fibre network for the remaining investment period. Therefore, the forecast of the cash flows is a significant assumption impacting the valuation of the financial instruments.</p> <p>Refer to Note 4, Investments in subsidiaries, and Note 7, Other financial liabilities, on how the key audit matter was identified in the valuation of these financial instruments.</p>	<p>We held discussions with management to obtain an understanding of the process applied in terms of determining the fair value of the financial asset and liability.</p> <p>We performed the following procedures:</p> <ul style="list-style-type: none"> • Evaluating GAIA Fibonacci Fibre REIT 1's fair value calculations and the principles and integrity of the discounted cash flow models. • Testing the inputs used in the cash flow forecast for reliability and accuracy. • Evaluating the cash flow forecasts for the first year of operation to the actual realised cash flows to determine the accuracy of management forecasts. • Testing management assumptions of the CPI Index, uptake rate of the fibre network and line speed demographics for the long-term outlook over the remaining investment period for the reasonability of it. • Testing the effect, the above assumptions have on the overall discount rate and recalculating this rate. • Re-computing of the fair values. <p>Based on the results of the above procedures, we consider the carrying value and disclosure of the financial asset and liability measured through profit and loss to be reasonable.</p>

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the document titled "GAIA Fibonacci Fibre REIT 1 Limited Separate Annual Financial Statements for the year ended 31 July 2022", which includes the Directors' Report, the Audit Committee's Report, Report of the Compiler and Certificate by the Company Secretary as required by the Companies Act of South Africa and a document titled "GAIA Fibonacci Fibre REIT 1 Limited Integrated Annual Report 2022". The GAIA Fibonacci Fibre REIT 1 Limited Integrated Annual Report for 2022 is expected to be made available to us after the date of this auditor's report. The other information does not include the separate financial statements and our auditor's report thereon.

Our opinion on the separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the GAIA Fibonacci Fibre REIT 1 Limited Integrated Annual Report 2022 report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

RESPONSIBILITIES OF THE DIRECTORS FOR THE SEPARATE FINANCIAL STATEMENTS

The directors are responsible for the preparation and fair presentation of the separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE SEPARATE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the separate financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that Moore Stellenbosch Incorporated has been the auditor of GAIA Fibonacci Fibre REIT 1 Limited for 1 year.

Report of the Compiler

To the Directors of Gaia Fibonacci Fibre REIT 1 Limited

We have compiled the accompanying financial statements of Gaia Fibonacci Fibre REIT 1 Limited based on information you have provided. These financial statements comprise the statement of financial position as at 31 July 2022, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the 10 month period then ended, and a summary of significant accounting policies and other explanatory information.

We performed this compilation engagement in accordance with International Standard on Related Services 4410 (Revised), Compilation Engagements.

We have applied our expertise in accounting and financial reporting to assist you in the preparation and presentation of these financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa. We have complied with relevant ethical requirements, including principles of integrity, objectivity, professional competence and due care.

These financial statements and the accuracy and completeness of the information used to compile them are your responsibility.

Accounting Policies

1. General information

Gaia Fibonacci Fibre REIT 1 Limited ('the company') performs investment activities.

The company was incorporated on 7 October 2021 as a Public company and domiciled in South Africa. Therefore, the annual financial statements are presented for the 10 months ended 31 July 2022.

Fund information

The REIT was established by Gaia Fund Managers (Pty) Ltd, in collaboration with Fibonacci Managers (Pty) Ltd, for the purpose of providing a channel through which institutional and retail investors could:

- benefit from direct investments into Fibre Networks, whilst
- providing a tax benefit through the REIT allowing for the investment to be taxed as if the property is held directly by the investor essentially allowing the investment's distributions to be seen as income in the hands of the investor.

1.1 Basis of preparation and summary of significant accounting policies

The financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these financial statements and the South African Companies Act 71 of 2008. The financial statements have been prepared under the historical cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below (including derivative instruments) at fair value through profit or loss. They are presented in Rands which is the company's functional currency.

These financial statements comply with the requirements of the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council and in compliance with the Cape Town Stock Exchange Listings requirements.

Significant judgements and sources of estimation uncertainty

The preparation of financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

Management have made critical judgements in applying accounting policies for the following:

- Fair value measurement
- Presenting financial instruments
- Investment entity characteristics (refer to note 1.2)

The company assessed that the financial asset is an equity instrument held as a derivative asset and therefore categorised as financial assets at fair value through profit or loss. The financial liability is also recognised as a financial liability at fair value through profit or loss.

Separate Financial Statements for the 10 month period ended 31 July 2022

Accounting Policies

General information continued...

When financial assets and financial liabilities are recognised at fair value, judgment is used in determining the valuation and the significant inputs. Therefore, a fair value hierarchy should be used that reflects the significance of these judgments. For both of the measurements of the investment in subsidiary (financial asset) and the preference shares liability (financial liability), the fair value was categorised as Level 3. This is that the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

Key sources of estimation uncertainty

Fair value measurement

The assets and liabilities of the company are either measured at fair value or disclosure is made of their fair values.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The company uses its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period.

Basis of valuation approach

The fair value approach of the financial instruments under management is determined as at the measurement date in accordance with the principles of IFRS 13, Fair Value Measurement. Fair value is defined as the price that would be received for an asset in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that a hypothetical transaction to sell an asset takes place in the principal market or in the absence, the most advantageous market for the asset.

The primary valuation methodology for the underlying financial instruments is the discounted cash flow ("DCF"). Management uses judgement to select the most appropriate valuation method. The DCF method is used to derive the fair value, being the discounting of the expected dividend income from the investments, of an asset using reasonable assumptions on the estimations of expected future post tax cash flows (dividend income) over the expected term of the A and B Preference Shares, 10 years. i.e. free cash flows to the Company. These cash flows are discounted to the present value by applying the appropriate discount rate that captures the risk inherent to the investment.

Assumptions

The fair value of investments in subsidiaries, as determined through a DCF, is driven by dividend cash flows received from property companies held by the investment company. Dividend cash flows from subsidiary fibre network property company are driven by forecast rental income and expenditure in projects underlying each subsidiary, which form the basis of the DCF valuation.

Individual project cash flows, which include income, expenditure and the nominal disposal value of each project at the end of its estimated life, are forecast. The timing and magnitude of project cash inflows are based on historic financial information, such as average revenue per user (ARPU), as well as non-financial metrics and market survey data, including, vacancy projections, demographics data. Forecast project cash outflows are based on a percentage of rental income, percentage of number of homes passed, and the percentage of active home-passes. Such outflows include the budgeted operation and maintenance costs, marketing spend, and ad-hoc maintenance costs. Long-term consensus inflation forecasts are incorporated into the project cash flows.

Dividend cash flows from subsidiaries are discounted at the appropriate discount rate, based on the required hurdle rate for investment by the investment entity. Preference Share valuations are based on the forecasted dividends cash flows from subsidiaries to the preference shareholders in line with contractually agreed distribution terms. The distributions to preference shareholders includes the allowable deduction of operational costs and ongoing listing fees.

General information continued...

Tax

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters are different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The company recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the company to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the company to realise the net deferred tax assets recorded at the end of the reporting period could be impacted.

The principal accounting policies applied in the preparation of these financial statements are set out below.

1.2 Consolidation

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the company has control. The company controls an entity when the company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Investment entities

An investment entity which acquires an interest in a subsidiary, joint venture or associate shall be exempt from consolidation or equity accounting in terms of amendments to IFRS 10, IFRS 12 and IAS 28 and shall measure an investment in a subsidiary, joint venture or associate at fair value through profit or loss in accordance with IFRS 9.

An investment entity is defined as an entity that:

- obtains funds from one or more investors for the purpose of providing those investors with investment management services
- commits to its investors that its business purpose is to invest in partners solely for returns from capital appreciation, investment income, or both; and
- measures and evaluates the performance of substantially all its investments on the fair value basis.

The Company has been deemed to meet the definition of an investment entity as per IFRS 10 based on the following:

- The REIT will obtain funds from various investors with the intention to provide investment management services to its investors. The investment management services, including best endeavours to ensure that the REIT is Section 25BB compliant, will be provided by Gaia Fund Managers (Pty) Ltd.
- The REIT commits to provide investors access to infrastructure investments for the purpose of generating returns from capital appreciation, investment income or both;
- The REIT intends to measure and evaluate its investments at fair value through profit and loss; and
- The REIT does not intend to hold its investments indefinitely with exit strategies including a sale to a third party. On the exit of all the fibre network assets in the Property SPV, the REIT is required to make distributions of ownership interests to all investors. This will effectively collapse all other investments in the group structure, which includes indirect equity and debt investments held by the REIT.

The entity is exempt from consolidation and will thus prepare separate annual financial statements. The investment in the subsidiary is measured at fair value through profit and loss in accordance with IFRS 9.

1.3 Intangible assets

Recognition

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

An assessment of the probability of expected future economic benefits that will flow to the entity as a result of the use of an asset is made by management before the asset is recognised. This includes using reasonable and supportive assumptions that represent a best estimate of the set of economic conditions that will exist over the useful life of the asset.

Initial measurement

Intangible assets are initially measured at cost.

Separately acquired assets are initially measured at their purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, and any directly attributable cost of preparing the asset for its intended use.

Expenditure on an intangible asset is recognised as an expense when it is incurred unless it is part of the cost of an intangible asset that meets the recognition criteria or if the item is acquired in a business combination and cannot be recognised as an intangible asset it is recognised as part of goodwill at the acquisition date. Expenditure on an intangible item that was initially recognised as an expense is not recognised as part of the cost of an intangible asset at a later date.

Subsequent measurement - Cost model

After initial recognition, intangible assets are measured at cost less any accumulated impairment losses.

The classification of useful lives and amortisation methods for the various classes of assets are as follows:

Asset class	Useful life classification
Software Assets	Indefinite

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate future net cash inflows

Impairments

The entity tests for impairment where there is an indication that an intangible asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of intangible assets is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount. The resulting impairment loss is recognised immediately in profit or loss, except where the decrease reverses a previously recognised revaluation increase for the same intangible asset in which case the decrease is recognised in other comprehensive income to that extent and reduces the amount accumulated in equity under revaluation surplus, and future depreciation charges are adjusted in future periods to allocate the revised carrying amount, less its residual value, on a systematic basis over its remaining useful life.

Where the estimated impairment loss exceeds the carrying amount of the intangible asset to which it relates, the resulting liability is only recognised if required by another standard.

Retirements and disposals

Intangible assets are derecognised on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss on disposal is recognised in profit or loss.

1.4 Financial instruments

Initial recognition of financial assets

Financial instruments held by the company are classified in accordance with the provisions of IFRS 9 Financial Instruments.

The classification of financial assets under IFRS 9 is based on whether the financial assets are equity instruments, debt instruments held or derivative assets. The classification and measurement of debt instruments is dependent on the business model in which the financial asset is managed and its contractual cash flow characteristics. The business model refers to how the company is managing its financial instruments to generate cash flows. The company first assesses the business model before considering whether an instrument meets the definition of the contractual cash flow test. Only if the financial instruments are held in a business model to collect contractual cash flows or a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the cash flows characteristics test is performed.

Equity instruments held as derivative assets are mandatorily categorised as financial assets at fair value through profit or loss (FVTPL).

A debt instrument is classified as a financial asset at amortised cost if it meets both of the following conditions:

- it is held within a business model where the objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

A debt instrument is classified at fair value through other comprehensive income (FVOCI) if it meets both of the following conditions:

- it is held within a business model where the objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets held in this type of business model are managed to realise cash flows by both collecting contractual cash flows and selling the financial instrument. Both these activities are fundamental to achieving the objective of the business model.

All debt instrument financial assets that were not classified as measured at amortised cost or FVOCI are measured at FVTPL. On initial recognition, the company may irrevocably designate a debt instrument financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Transaction costs that are directly attributable to the acquisition of financial assets are expensed in profit or loss for financial assets initially classified at FVTPL. For financial assets not classified at FVTPL, transaction costs are added to or deducted from the fair value at initial recognition.

Subsequent measurement of financial assets

Financial assets at fair value through profit and loss	These assets are subsequently measured at fair value. The assets consist of investments at fair value through profit or loss (Note 4). Net gains and losses, including any interest or dividend income, are recognised in profit or loss. Any gains or losses arising on the derecognition are included in profit or loss in other operating income/expense.

(Registration Number 2021/926046/06)

Separate Financial Statements for the 10 month period ended 31 July 2022

Accounting Policies

General information continued...

Initial recognition of financial liabilities

Financial liabilities not measured at FVTPL on initial recognition are measured at fair value less transaction costs that are incremental and directly attributable to the issue of the financial liability. Transaction costs of financial liabilities carried at FVTPL are expensed in profit or loss.

The company irrevocably designate the financial liabilities to be measured at fair value through profit or loss.

Subsequent measurement of other financial liabilities

Financial liabilities at amortised cost	These liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense is recognised in profit or loss. The liabilities include trade and other payables (refer to note 8) Any gains or losses arising on the derecognition are included in profit or loss in other operating income/expense.
Financial liabilities at fair value through profit or loss	These liabilities consist of preference shares, and are subsequently measured at fair value. Net fair value gains and losses, including any interest expense are recognised in profit or loss (note 7).

Write off policy

The company writes off a financial instrument at amortised cost when the entity has no reasonable expectation of recovery of the outstanding balance of the instrument. Determining when to write off financial assets is a matter of judgement and incorporates both quantitative and qualitative information. Indicators to write-off the asset include when interest repayments are 120 days past due and there is no reasonable expectation of recovery, as well as discussions with counterparties to the instruments. Where loans or receivables have been written off, the company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit or loss.

Credit risk

Details of the credit risk of financial assets are included in the financial instruments and risk management note (note 23).

Derecognition

Financial assets

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire or when it is transferred and the transfer qualifies for derecognition.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Levies in arrears are measured at initial recognition at fair value plus transaction costs. They are subsequently measured at amortised cost using the effective interest rate method, less allowance for expected credit losses.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss within operating expenses. When levies in arrears are uncollectable, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses in profit or loss.

Levies in arrears are classified as loans and receivables.

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Separate Financial Statements for the 10 month period ended 31 July 2022

Accounting Policies

General information continued...

Cash and cash equivalents

Cash and cash equivalents are initially stated at carrying amount, which is deemed to be fair value, and subsequently carried at amortised cost which is deemed to be fair value. Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Trade and other payables

They are recognised when the company becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs.

Trade and other payables expose the company to liquidity risk and possibly to interest rate risk. Refer to note 23 for details of risk exposure and management thereof.

1.5 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Gaia Fibonacci Fibre REIT was listed as a Real Estate Investment Trust (REIT). As a result, section 25BB of the Income Tax Act applies to qualifying REIT income and expenses. The legislation provides that capital gains on sale of immovable properties are not taxable and previous building allowances claimed will be recouped at the company tax rate. All rental income and dividends from property subsidiaries will be taxed at 28% and any qualifying distribution paid from these taxable profits will be deductible at 28%. Should the entities' assets be sold or the entity wound up, there could be a tax liability to the value of the recoupments previously claimed.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Separate Financial Statements for the 10 month period ended 31 July 2022

Accounting Policies

General information continued...

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

No deferred tax was recognised on the fair value adjustments to the investments held in the property companies, as defined in section 25BB of the Income Tax Act. These assets do not attract capital gains tax.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Stated capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Ordinary shares are recognised at no par value and classified as stated capital in equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

Dividends declared are recognised in equity.

Preference shares which carry non-discretionary dividend obligations, should be classified as liabilities. The dividends on these preference shares are taken to the Statement of Profit and Loss or Other Comprehensive Income as interest expense. Please refer to note 14.

1.7 Revenue

Dividend income is presented as revenue in the Statement of Profit and Loss and Other Comprehensive Income as the dividends that the entity receives are in the ordinary course of the entity's business.

1.8 Investment income

Interest income, including interest from non-derivative financial assets at fair value through profit or loss, is recognised, in profit or loss, using the effective interest method.

Gaia Fibonacci Fibre REIT 1 Limited

(Registration Number 2021/926046/06)

Separate Financial Statements for the 10 month period ended 31 July 2022

Accounting Policies

General information continued...

The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial instrument (or, when appropriate, a shorter period) to the carrying amount of the financial instrument. When calculating the effective interest rate, the Company will estimate future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

Dividend income or expense is recognised when the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed or received at the end of the reporting period.

1.9 Borrowing costs

Borrowing costs are recognised as an expense in the period which they are incurred.

1.10 Statement of cash flows

The statement of cash flows is prepared on the direct method, whereby the major classes of gross cash receipts and gross cash payments are disclosed.

For purposes of the statement of cash flows, cash and cash equivalents comprise cash on hand and deposits held on call with banks net of bank overdrafts, all of which are available for use by the company unless otherwise stated.

Investing and financing activities that do not require the use of cash and cash equivalents are excluded from the statement of cash flows.

2. New Standards and Interpretations

Standards and interpretations not yet effective

The Company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the Company's accounting periods beginning on or after 1 January 2023 or later periods:

Standard/ Interpretation	Details of amendment	Annual periods beginning on or after	Application of standard
IAS 1: Amendments to clarify the classification of liabilities	The amendments require companies to disclose their material accounting policy information rather than their significant accounting policies, with additional guidance added to the Standard to explain how an entity can identify material accounting policy information with examples of when accounting policy information is likely to be material.	1 January 2023	This amendment will be adopted for the financial year ending 30 July 2024 and is not expected to materially impact the Company.
IAS 8: Accounting Policies, Changes in Accounting Estimates and Errors (Amendment – Definition of Accounting Estimates)	The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates, by replacing the definition of a change in accounting estimates with a new definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. The requirements for recognising the effect of change in accounting prospectively remain unchanged.	1 January 2023	This amendment will be adopted for the financial year ending 30 July 2024 and is not expected to materially impact the Company.
IAS 12: Income Taxes (Amendment – Deferred Tax related to Assets and Liabilities arising from a Single Transaction)	The amendment specifies how companies should account for deferred tax related to Assets and Liabilities arising from a Single Transaction on transactions such as leases and decommissioning obligations. In specified circumstances, companies are exempt from recognising deferred tax when they recognise assets or liabilities for the first time. Previously, there had been some uncertainty about whether the exemption applied to transactions such as leases and decommissioning obligations – transactions for which companies recognise both an asset and a liability. The amendments clarify that the exemption does not apply and that companies are required to recognise deferred tax on such transactions.	1 January 2023	This amendment will be adopted for the financial year ending 30 July 2024 and is not expected to materially impact the Company.

Investments in subsidiaries continued...

Fair value information of investments in subsidiaries

The Company has adopted an accounting policy of measuring its investments at fair value through profit or loss in accordance with IFRS 9 with fair value movements on its assets recognised in the Statement of Profit or Loss. The investments in GF Property SPV 1 (RF) (Pty) Ltd and GF Property SPV 2 (RF) (Pty) Ltd are measured at fair value on a stand alone basis and the Company uses the same valuation method to measure fair value in its investments in GF Property SPV 1 (RF) (Pty) Ltd and GF Property SPV 2 (RF) (Pty) Ltd.

Valuation of investments in subsidiaries

For financial assets recognised at fair value, disclosure is required of a fair value hierarchy which reflects the significance of the inputs used to make the measurements.

Level 1: Quoted unadjusted prices in active markets for identical assets or liabilities that the group can access at measurement date. The quoted market price used for financial assets is the current bid price. These instruments are included in level 1.

Level 2: Inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. If all significant inputs are required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: Applies inputs which are not based on observable market data. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

The primary valuation methodology for the underlying investments held by the Fund is the discounted cash flow ("DCF") methodology. Some of the significant inputs into the discounted cash flow model may not be observable in the market and are derived from market prices or rates or are based on assumptions. This valuation model therefore requires a higher degree of management judgement and estimation in determination of fair value.

In the valuation for the investments, management's judgement and estimation is required for:

- Selection of the appropriate valuation model to be used, in this case the discounted cash flow model;
- Assessment and determination of the expected cash flows (dividend income and preference dividend) from the underlying investments; and
- Selection of the appropriate discount rates.

The value of the investments in GF Property SPV 1 (RF) (Pty) Ltd and GF Property SPV 2 (RF) (Pty) Ltd were determined using the discounted cash flow valuation models. Assumptions and inputs used in valuation techniques include CPI and investor premium used in estimating discount rates.

The table below analyses financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position. Investment in subsidiaries are recognised at fair value through profit or loss for which the carrying amounts equal its fair value.

As at 31 July 2022, the fair value measurement of shares held by the Company in GF Property SPV 1 (RF) (Pty) Ltd and GF Property SPV 2 (RF) (Pty) Ltd are categorised into Level 3.

Investments in subsidiaries continued...

Assumptions

Discount rate	GF Property SPV 1: 15.43% GF Property SPV 2: 15.47%	The investments in subsidiaries are valued on a real basis, as such of 15.11% for GF Property SPV 1 and 15.15% for GF Property SPV 2, and are adjusted for the risk premium of the company for the ordinary shareholders.
Cash flow	Expected dividends and proceeds from disposal of assets	Investee entities make distributions from profits which are made up of rental income net of operating expenses, and proceeds from disposal of the fibre assets at the end of their useful lives. The disposal value is determined by adjusting the initial acquisition costs of the assets with a forecasted inflation rate, at the end of the discount period.
Discount period	Remaining term of the 10-year	Expected term of the A and B Preference Shares, 10 years.

Reconciliation of assets measured at level 3

2022	Opening balance	Additions	Fair value through profit/(loss)	Closing balance
Assets				
Financial assets at fair value through profit/(loss)				
Investments in subsidiaries	-	158,043,185	28,794,875	186,838,060
				186,838,060

Sensitivity of fair value measurement to changes in unobservable inputs

Although management believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, changing one or more of the assumptions used to reasonably reflect possible alternative assumptions would have the following effects on net assets.

GF Property SPV 1 (RF) (Pty) Ltd					
Valuation technique	Significant unobservable inputs	Estimates for unobservable inputs	Fair value at 31 July 2022	1% decrease in unobservable input	1% increase in unobservable input
Discounted cash flow	Discount rate	15.43%	136,184,390	7,759,663	(7,186,703)

GF Property SPV 2 (RF) (Pty) Ltd					
Valuation technique	Significant unobservable inputs	Estimates for unobservable inputs	Fair value at 31 July 2022	1% decrease in unobservable input	1% increase in unobservable input
Discounted cash flow	Discount rate	15.47%	50,653,670	2,956,534	(2,732,121)

Separate Financial Statements for the 10 month period ended 31 July 2022

Notes to the Financial Statements

Figures in R

2022

Investments in subsidiaries continued...

Significant observable/unobservable inputs are developed as follows:

Discount rate: The discount rate uses the latest internal rate of return of the investment and adds a risk margin. The risk margin is determined by management and is based on financial risk of the company.

CPI rate: The consensus macroeconomic view as compiled by PWC and the National Treasury was utilised in setting the CPI inflation outlook over the investment period of 10 years.

Uptake rate: The use of the fibre infrastructure and the rate of the increase in the uptake rate is based on the historic data from average revenue per user (ARPU), as well as non-financial metrics and market survey data, including vacancy projections and demographic data.

4.2 Interests in unconsolidated subsidiaries

The company is classified as an investment entity, and therefore applies the consolidation exemption. All investments are measured at fair value through profit and loss.

7.2 Disclosures

Fair value information of other financial liabilities

The Company has adopted an accounting policy of measuring its investments at fair value through profit or loss in accordance with IFRS 9 with fair value movements on its assets recognised in the Statement of Profit or Loss and Other Comprehensive Income. The preference share liabilities is measured at fair value on a stand alone basis and the Company uses some of the parts valuation method to measure the fair value of the preference shares.

Valuation of other financial liabilities

For other financial liabilities recognised at fair value, disclosure is required of a fair value hierarchy which reflects the significance of the inputs used to make the measurements.

Level 1: Quoted unadjusted prices in active markets for identical assets or liabilities that the group can access at measurement date. The quoted market price used for financial assets is the current bid price. These instruments are included in level 1.

Level 2: Inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. If all significant inputs are required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: Applies inputs which are not based on observable market data. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

The primary valuation methodology for the underlying investments held by the Fund is the discounted cash flow ("DCF") methodology. Some of the significant inputs into the discounted cash flow model may not be observable in the market and are derived from market prices or rates or are based on assumptions. This valuation model therefore requires a higher degree of management judgement and estimation in determination of fair value.

In the valuation for the investments, management's judgement and estimation is required for:

- Selection of the appropriate valuation model to be used, in this case the discounted cash flow model;
- Assessment and determination of the expected cash flows (dividend income and preference dividend) from the underlying investments; and
- Selection of the appropriate discount rates.

The value of the preference shares was determined using the discounted cash flow valuation models. Assumptions and inputs used in valuation techniques include CPI and investor premium used in estimating discount rates.

The table below analyses financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position. Preference shares are recognised at fair value through profit or loss for which the carrying amounts equal its fair value.

As at 31 July 2022, the fair value measurement of the preference shares is categorised into Level 3.

15. Income tax expense

The income tax for the 10 month period can be reconciled to the accounting profit / (loss) as follows:

Profit before tax from operations	16,145,451
Income tax calculated at 28.0%	4,520,726
Tax effect of	
- Fair value adjustments	(4,566,407)
- Limitation of section 25BB deduction	<u>45,681</u>
Tax charge	<u>-</u>

Deferred tax

Section 25BB of the Income Tax Act allows for the deduction of the qualifying distribution paid to shareholders, but the deduction is limited to taxable income. To the extent that no tax will be payable in the future as a result of the qualifying distribution, no deferred tax was raised on the fair valuation of non-current financial liabilities.

IAS 12 Income Taxes (amended) requires the sale rate to be applied, unless rebutted, when calculating deferred taxation on the fair value adjustments. As the company is a REIT, capital gains tax is no longer applicable on the sale of the investment in subsidiaries in terms of section 25BB of the Income Tax Act. The deferred tax rate applied to investment in subsidiaries at the sale rate will therefore be 0%. Consequently, no deferred taxation is raised on the fair value adjustments on investments in subsidiaries.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Consequently, no deferred tax asset is accounted for with respect to the assessed loss.

In the budget speech held on 24 February 2022, the Minister of Finance announced the reduction of the company income tax rate from 28% to 27% from 1 April 2023. This change does not currently affect the company as no deferred tax has been recognised.

18. Events after the reporting date

On 19 August 2022 the company concluded a specific issuance of B Preference shares for an aggregate subscription of R111 243 027 which was immediately used to purchase additional shares in the subsidiary GF Property SPV 2. The additional funding was reserved for further investments into fibre networks to be completed in the 2022 calendar year.

The company declared a dividend of R 3 172 491 on 31 October 2022 which was determined with reference to its financial results as reflected in its financial statements prepared for the 2022 year of assessment (ended 31 July 2022).

The aforementioned event is considered a non-adjusting event after the reporting period.

The directors are not aware of any matter or circumstance arising since the end of the 10 month financial period to the date of this report that could have a material effect on the financial position of the company.

19. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

Capital risk management

The Company's objective when managing capital (which includes share capital, borrowings, working capital and cash and cash equivalents) is to maintain a flexible capital structure that reduces the cost of capital to an acceptable level of risk and to safeguard the Company's ability to continue as a going concern while taking advantage of strategic opportunities in order to maximise stakeholder returns sustainably.

To maintain or adjust the capital structure, the Company may adjust the number of dividends paid to shareholders, return capital to shareholders or issue new shares.

Financial risk management

Overview

The company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk; and
- Market risk (interest rate and price risk)

Credit risk

The directors have overall responsibility for the establishment and oversight of the company's risk management framework. The company's risk management policies are established to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the company's activities.

"Credit risk" is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered with the Company, resulting in a financial loss to the Company.

The company is mainly exposed to credit risk on cash and cash equivalents. Credit risk exposure arising on cash and cash equivalents is managed by the company through dealing with well established financial institutions with high credit ratings. The company considers credit risk on cash and cash equivalents to be minimal.

No credit limits were exceeded during the reporting period, and management does not expect any losses from non performance by these counterparties. The company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all receivables. No receivables were considered impaired in terms of IFRS 9.

Financial assets maximum exposure to credit risk at the end of the 10 month period were as follows:

2022	Note	Gross carrying amount	Credit loss allowance	Amortised cost
Financial instrument				
Cash and cash equivalents	4	1,234,813	-	1,234,813
		1,234,813	-	1,234,813

Liquidity risk

"Liquidity risk" is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Company manages liquidity risk through an ongoing review of future commitments and expenses compared to available cash to meet those commitments. Cash flow forecasts are prepared and presented to the Board for approval.

Figures in R

2022

Financial instruments and risk management continued...

The class A preference shares and class B preference shares liability is an estimation based on discounted future cash flows as per the model. (Refer to Key sources of estimation uncertainty, assumptions paragraph) The company is expected to receive a dividend based on the model from its subsidiaries. The expected dividend receivable will service the expected operational expense as well as the class A preference share and class B preference shares liability. The company will therefore be able to meet its obligation.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

2022	Note	less than 1 year	2 - 5 years	More than 5 years	Total cash flows	Carrying amount
			R	R	R	R
Non-current liabilities						
Other financial liability	7	-	90,377,808	380,432,447	470,810,254	171,980,912
Current liabilities						
Trade and other payables	8	102,484	-	-	-	102,484
		102,484	90,377,808	380,432,447	470,810,254	172,083,396

Market risk

Market risk arises through the use of interest-bearing financial instruments. It is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates.

Increased competition to a valuable investment opportunity such as Demand Index (DI) will drive prices higher reducing return/margin at future investment opportunities. Superior technologies enter the market making fibre less attractive/redundant.

Please refer to note 4 and note 7.
